

# Eric Khalil Zacharia

Data Science – Masters Student

☎ 774-239-5342 | 📧 ekzachar@uchicago.edu | 🏠 ericzacharia.github.io | 🌐 ericzacharia | 📺 ericzacharia

## EDUCATION

**University of Chicago** | Chicago, IL | *M.S. in Computer Science, Specialization in Data Analytics* **December 2021**

🔗 Courses: Machine Learning, Natural Language Processing, Advanced Data Analytics, Algorithms, Advanced Python, Databases, Applied Financial Technology, Web Development, Parallel Programming, Computer Systems, Discrete Math

**Syracuse University** | Syracuse, NY | *B.S. in Aerospace Engineering*

**May 2016**

🔗 Awards: George M. Berry Award for Outstanding Design Achievement in Engineering

## SKILLS AND LANGUAGES

**Advanced** Python, PyTorch, TensorFlow, Pandas, NumPy, SciPy, Scikit Learn, matplotlib, HTML5, CSS3, VS Code, PyCharm, Atom, MATLAB, Excel, PowerPoint, Word, Git Bash, Terminal, GitHub, Windows, Mac OS

**Intermediate** Go, Flask, Jupyter, NetworkX, Seaborn, SQL, LaTeX, JSON

**Beginner** JavaScript/ES6, Django, React, jQuery, PHP, Bootstrap

## TECHNICAL RESEARCH & PROJECT EXPERIENCE

**Machine Learning Implementations** | Chicago, IL

**May 2021**

- 🔗 Implemented the following machine learning models from scratch in Python
- 🔗 Decision Tree learner and classifier with multiple split nodes and pruning, linear and logistic regressions with gradient descent, neural network for MNIST dataset with forward and backward propagation and Xavier weight initialization, convolutional neural network with convolutional layer supporting various strides and padding as well as ReLU and max pooling layers.

**Python Data Structures & Algorithms** | Chicago, IL

**March 2021**

- 🔗 Implemented the following algorithms as object-oriented classes with methods in their base form, as well as methods relevant to their applications for solving common problems
- 🔗 AVL tree, Binary Search Tree, Binary Min Heap, BFS, DFS, Dijkstra, Prim, Kruskal, Ford-Fulkerson (Edmond-Karp), Randomized Quicksort, 3-Partition Quicksort, Merge Sort, LRU Cache, Open Addressing Hash Table

**Slack Clone** | Chicago, IL

**March 2021**

- 🔗 Created a single-page web application using asynchronous JavaScript and Flask that invited users to create an account using an email and password that would be salted, peppered, and hashed for secure storage in a database
- 🔗 Users can take advantage of the “forgot password” feature, change their username, change their password, create a new messaging channel, and reply to messages from other users within a channel
- 🔗 User account information and messages linked with their replies and channel information are stored in the database

**Pinterest Clone** | Chicago, IL

**February 2021**

- 🔗 Allowed users to create an ephemeral “mood board” using a Bing’s image search API

**Content Management System** | Chicago, IL

**January 2021**

- 🔗 A web journal that supports posts from users and a comment system on those posts

**Speaker Recognition System** | Chicago, IL

**December 2020**

- 🔗 Compares scripts of text from two known speakers and one unknown speaker as input, and outputs the speaker who most likely spoke the unknown script. Implemented a hash-table and a Markov Model

**Programming Language Compiler** | Chicago, IL

**December 2020**

- 🔗 Compiles Jack programming language files into virtual machine files

**Blob Video Game** | Chicago, IL

**November 2020**

- 🔗 A video game called Blob. Inspired by the Snake Game and agar.io, Blob is always in motion, and dies when it runs off screen. Blob’s radius increases with each smaller blob consumed, while evading the increasing number of poison pellets

**Virtual Machine to Assembly Translator** | Chicago, IL

**November 2020**

- 🔗 Translates virtual machine files into assembly language files

**Text Completion Suggestions** | Chicago, IL

**October 2020**

- 🔗 Repeatedly prompts the user for a prefix to complete based on an input text file. A set of words that complete the prefix are provided

**Alpha Vantage Stock API – 20 Year Stock History Graph Generator** | Chicago, IL

**July 2020**

- 🔗 Reads a stock symbol from the command line and graphs every date and closing price for the past 20 years

**K-Letter Word Proportions – An Authorship Verification** | Chicago, IL

July 2020

- Prints the proportion of 1-letter, 2-letter, ..., and 13+ letter words in an input text file. The proportions are compared to another text known to be written by the author to help verify if the input text is their work.

**Roman Numeral to Arabic Number Converter** | Chicago, IL

June 2020

- Converts Roman Numeral strings to their Arabic number equivalents

**Caesar Cypher Encryptor** | Chicago, IL

June 2020

- Encrypts and decrypts text files using the Caesar Cypher method

**Buy vs. Rent Calculator** | Wichita, KS

November 2017 – January 2019

- Designed a user-friendly spreadsheet calculator that shows a month-to-month profit comparison for one's current rental situation against their desired home purchase and sold a copy to a local brokerage firm
- Optimized the accuracy of the calculator with knowledge of the home buying experience, principle, interest, escrow, loans, taxes, utilities, closing fees, insurance options, inspections, agent fees, etc.

**Hydrodynamics of Dolphin Caudal Fins** | Syracuse, NY

June 2015 – May 2016

- Studied the fluid dynamics and propulsive aspects of dolphin tails and experimented with 3D printed dolphin caudal fins that mimicked swimming motion inside a water tunnel
- Synthesized knowledge of MATLAB, Excel, SolidWorks (CAD), 3D printing, Arduino, planar laser-induced fluorescence, HD videography, aerodynamics, fluid dynamics, and electrical circuits
- Used fluorescent dye, highlighted with planar-shaped lasers, to outline trailing edge vortices, and created 3D vortex visualizations constructed on MATLAB using pixel data from the HD recordings of the 2D vortex sheets

**Model Aircraft Competition** | *First Place Winner* | Syracuse, NY

January 2016 – May 2016

- Engineered, built, and flew a six-foot model aircraft using a DC motor, balsa wood, and composites materials by using knowledge of aerodynamics, stability and control, electrical engineering, and 3D printing

**WORK EXPERIENCE****Spirit AeroSystems, Inc.** | *Aerospace Stress Engineer, Structural Analysis* | Wichita, KS

August 2016 – August 2020

- Worked on teams that designed, built, analyzed, and tested aerospace structures for The Department of Defense, Boeing's 787 Dreamliner, and Boeing's 777X; gained promotion to Level II Stress Engineer within 18 months
- Applied knowledge of MATLAB, Excel, linear algebra, ABD matrices, statics, dynamics, fatigue, damage tolerance, crack growth, Finite Element Analysis, Computer-Aided-Design, and properties of aluminum and composite materials

**Glacier's Bed and Breakfast** | *Airbnb Rentals - Super Host* | Wichita, KS

July 2018 – March 2020

- Purchased a 3-bedroom home and became a self-employed Super Host by sustaining a 5-star rating with over 80 bookings

**EXTRACURRICULARS & CERTIFICATIONS**

Secret Government Security Clearance | Private Pilot | Open Water Scuba Diver | Learn to Ice Skate Instructor  
Varsity Ice Hockey Coach | Alternate Captain, Syracuse University Roller Hockey
